

```
.base-button {
  @extend .base-focus;
  border: 1px $buttonBorderColor solid;
  color: #242424 !important;
  font-weight: bold;
  position: relative;
  text-decoration: none;
  @include filter-gradient(lighten($buttonBorderColor, 20%),
    $buttonBorderColor);
  @include text-shadow(rgba(white, .5) 0 1px 1px);
  @include background(linear-gradient(top,
    lighten($buttonBorderColor, 20%), $buttonBorderColor)
);
```

Are you strong in Ruby & JavaScript? We need your support — we're looking for smart minds like you!

cognita develops and runs the media monitoring solution blueReport which compiles information and analysis according to our customers' needs. Our clients are mainly large corporations, federations, and organizations, as well as media and communications agencies in the German-speaking region.

What does it mean to **work for cognita**?

- ▶ cognita has a young and **agile development team**.
- ▶ team members are welcome to come up with **new ideas**, realize their **own development projects** and take **responsibility** for them.
- ▶ We code with the world's best programming language: **Ruby**. And **JavaScript**.
- ▶ cognita offers you **exciting challenges**; everyday there's something **new** to learn
- ▶ You work at your favorite time of day, **not "9 to 5"**. Our spacious loft office is located in **Berlin Mitte** and is well connected to public transportation.

Do you have any further questions? Don't hesitate to mail Denis or call him directly:
nordmann@cognita.ch or **044 500 4460** (Zürich) / **030 340 600 200** (Berlin)
